Profile

Hi, I am Megan. I specialise as a full stack developer, I have mastered fundamental knowledge of modern frontend and backend technologies, by building web applications including the JavaScript, HTML, CSS, JSX programming languages, with Node.js and API tools, and related libraries/frameworks like Vue.js.
I describe myself as a passionate and curious self-starter who finds true enjoyment optimising user experiences, and supporting the delivery of impactful, well-performing projects around the world.

Professional Experience

12/2021 – present	**Software engineer,** *100Devs* An American NGO that funded an inclusive online bi-weekly cohorts: for building impactful full stack projects, with Express.js Vue.js React and other famous frameworks, using, JavaScript HTML CSS3 programming languages. Also working on backend projects with Mongodb as a database platform.	United-States
06/2019 – present	**Office Administrative Assistant,** *Crédit Agricole next bank* • Reviewed external penetration tests and regulatory audits to remediate its findings to ensure the security of the network resources; • Performed daily administrative functions such as answering calls and emails, scheduling meetings, writing multiple reports and other forms. • Provided constant and reliable administrative support to 14 banking offices across Switzerland. • Assisted the HR manager by maintaining personnel files for active and terminated employees. • Maintained, coordinated and updated multiple databases, records and mailing lists. • Maintained an inventory of office supplies. • Transformed manual processes into a computerized, well-documented standard operating procedures system (SOP). • Managed and prepared multiple reports, spreadsheets, documents and other forms and handled all media and PR inquiries. • Scheduled meetings and managed the calendar, took the meeting minutes and forwarded the minutes via email to all the partners.	Geneva, Switzerland
11/2016 – 12/2018	**Flight Cabin Crew,,** *Etihad Airways, Royal Jet*	Abu Dhabi, United Arab Emirates

Skills

CSS
(core technology for building Web pages)

Github, Glitch, Codepen, VSCode
(platform that enables the rapid development and deployment of back-end applications like APIs, integrations and automations.)

React
A User Interface library on JavaScript language(JSX). I chose to work with that tool because it builds quickly and easily complex UI components.

AWS
Cloud computing solutions/ Application host

Javascript
(core technology for building Web pages)

REST API
lightweight data-interchange interface set with complex functionnalities

Express.js
I use that infrastructure to build APIS on the backend server.

Jest & Mocha
Code testing frameworks

Node.Js
Open source development platform for executing JavaScript code server-side with back end technologies. My everyday tool to build my full stack projects.

Git
version control system that lets you manage and keep track of your source code history.

Nextjs

Bootstrap & Tailwind
CSS frameworks

HTML5
(core technology for building Web pages)

Vue.js
Progressive framework to build front-end applications. I built my dog app with that tool, that I am very familiar with.

Mongodb
Data developer platform

Education

09/2012 – 06/2015	**Law undergraduate courses -,** *Jean Moulin Lyon III University* Completed 35 credits towards a degree of laws	Lyon

Certificates

Front-end Foxes bootcamp ⧉
Front-end web development skills Bootcamp

Technologies used:
CSS - HTML5 - Javascript - API

Software Engineering Virtual Experience Certificate of Completion ⧉
JP Morgan Virtual Experience Program - May 2022

Participated in the open access JP Morgan Virtual Experience Program with Forage.
Tasks Completed include:
- *Interface with a stock price data feed*
- *Use JPMorgan Chase frameworks and tools*
- *Display data visually for traders*

Technologies used: Python, NPM, Node.js

Courses

	Udemy Javascript courses, *The Web Developer Bootcamp 2022 by Colt SteeleUdemy* ⧉	
present	**JavaScript30** ⧉ 30 days Javascript project challenges	
present	**#100devs,** *NGO* ⧉ Full stack development cohort funded by a non governmental organisation	Boston, United States
	Front-end foxes ⧉ Front-end web development skills Bootcamp	

Projects

present	**My blog,** *a blog that shows my journey into tech* Using React Nextjs Markdown Tailwind

Yelpcamp my 100h project, *github code souce : https://github.com/Megan74/YelpCamp*
Yelpcamp my 100h project

Currently working on a CRUD application that integrates MongoDB for storing data, Bootstrap framework to design the app features, and Express middleware for the backend: fetch the API data from the server to the client-side, and create update delete the posts through its CRUD methods.

The application concept is pretty similar as Yelp and Tripadvisor: the user can chose the best campgrounds, based on the prices and locations.

That full stack application has also the functionality to add your own campsites suggestions, update or delete them.

website link : https://yelpcamp74.herokuapp.com/ ⧉

Dogstagram app ⧉
Like and store your favourite dog pictures.

technologies used: Javascript- CSS3 - API - Vue.js

https://github.com/Megan74/Dogstagram ⧉

Todo list app ⧉
Create lists and write off the things you have done.

Typing game ⧉
Fun game built with HTML, CSS and Javascript.

Languages

French ● English

Interests

Fashion *(I love designing clothes on Adobe Sketch, and then create it with fabrics with my sewing machine.),*
Sport *(Running 10km twice a week, yoga, pilates, exercises indoor, hiking, snowshoeing and snowboarding),*
Travelling *(Malaysia, Hong Kong, USA, China, Thailand, Japan, Costa Rica, Australia, Europe, Middle East)*
